

JEE Main 11th Standard

HIGH WEIGHTAGE BACKLOG CHAPTERS PRIORITY

CRITICAL CHAPTERS ONLY: This guide focuses on the highest weightage chapters from 11th standard that are absolutely mandatory before starting 12th. These chapters have direct application in 12th topics and carry significant weightage in JEE Main & Advanced. Students with backlog must prioritize these chapters to strengthen their foundation.

TOP 3 PHYSICS CHAPTERS (HIGH WEIGHTAGE)

1. Units & Dimensions

- Reason: Direct questions + helps in derivations & error checking
- Almost every numerical mein use hota hai

2. Kinematics

- Reason: Base of entire mechanics
- 12th ke topics (like electrostatics motion, modern physics) mein indirectly kaam aata hai

3. Newton's Laws of Motion (NLM)

- Reason: *Most important chapter of mechanics*
- Without this → you can't solve questions in any force-based system

4. Work, Energy & Power (WEP)

- Reason: Alternative method for solving tough questions
- JEE Advanced loves energy-based shortcuts

5. Center of Mass & Rotational Motion (Basic understanding)

- Reason: High weightage + conceptual depth
- Rotation ka basic idea → needed for advanced problems

TOP 3 CHEMISTRY CHAPTERS (HIGH WEIGHTAGE)

1. Mole Concept

- Reason: Entire chemistry ka maths yahi hai
- Every chapter mein use hota hai (physical + organic + inorganic)

2. Chemical Bonding

- Reason: *Most important chapter in chemistry*
- Structure samjhe bina inorganic + organic dono weak

3. Periodic Table

- Reason: Trends = direct questions
- Helps in bonding, reactions, properties

4. GOC (General Organic Chemistry)

- Reason: Organic ka entry gate
- If GOC weak → 12th organic = disaster

5. Hydrocarbons

- Reason: Reaction basics
- Builds reaction mechanism understanding

TOP 3 MATHEMATICS CHAPTERS (HIGH WEIGHTAGE)

1. Basic Mathematics (Quadratic + Modulus + Inequalities)

- Reason: Used everywhere
- Calculus aur algebra dono mein kaam

2. Functions

- Reason: Core of calculus (12th ka king topic)
- Graph samjhna → calculus easy

3. Trigonometry (Basic identities + graphs)

- Reason: Heavy use in calculus + physics
- Without trig → integration/differentiation pain

4. Straight Lines (Coordinate Geometry basics)

- Reason: Geometry + vectors + calculus applications
- Easy scoring if basics LED CHAPTER BREAKUP - MATHEMATIC

■ STUDY PLAN - Daily Schedule:

2-3 Hours Daily Strategy:

1. **Concept Review** (30 min) - Watch 1 quality YouTube video or read textbook
2. **Formula Derivation** (20 min) - Understand WHY each formula exists
3. **Problem Solving** (70 min) - Do 10-15 problems of increasing difficulty
4. **Revision** (15 min) - Review notes & write down key points

Weekly Schedule:

- Mon-Fri: Concept + Problems (2.5 hrs each)
- Saturday: Full chapter revision + 30 more problems
- Sunday: Mock tests focusing on 1-2 chapters

■ BACKLOG RECOVERY TIPS:

1. **Focus on Fundamentals Only** – Don't attempt advanced questions. Master basic concepts first.
2. **Use Targeted Resources** – Physics Wallah, Khan Academy, NCERT for these 9 chapters only.
3. **Make Cheat Sheets** – Create 1-page formula & concept sheets for each chapter.
4. **Solve Previous Year JEE Questions** – Practice 10-15 year questions for these topics.
5. **Avoid New Chapters** – Don't jump to 12th chapters until these 9 are complete.
6. **Weekly Assessments** – Take 30-minute quizzes after each chapter.
7. **Group Study** – Solve doubts with peers to save time.
8. **Complete 12th Topics Before 12th Starts** – This is your competitive advantage.

■ **PRIORITY RULE:** These 14 chapters (5 Physics, 5 Chemistry, 4 Maths) are non-negotiable. Completing them before 12th means you already have a 6-month head start in JEE preparation. Don't compromise on the fundamentals of these chapters - they are the make-or-break chapters for your JEE score.
